

POWER BI CHALLENGE

TASK 7 – DASHBOARD VISUALIZATION (PART 2)

The screenshot shows the Microsoft Power BI desktop application. At the top, the ribbon has tabs for File, Home, Insert, Modeling, View, Optimize, and Help. The Home tab is selected. Below the ribbon, there are several icons for data sources like Excel, OneLake, SQL, and Data. The main workspace contains two visualizations: a matrix visual on the left and a table visual on the right. The matrix visual shows sales data categorized by Month ID and Order ID. The table visual shows detailed order information including Month ID, Order ID, Customer Name, Profit, and Total Sales. To the right of the workspace is a pane titled 'Visualizations' which lists various chart types and a 'Data' pane which shows a list of fields and their properties. The bottom of the screen shows the status bar with page navigation, zoom controls, and a download link.

- Created a Matrix for Category and Total Sales in Matrix
- Created a Table for Month ID, Order ID, Customer Name, Profit and Total Sales

- Create a Tree map for Total Sales by Category
- Created a Line and Stacked Column Chart for Total Quantity and Average Order by Month ID
- Created a Map Visual by Total Sales and Profit by City
